1. Installation
2. Dimmer

On/Off & Dimmer

Press the button ☀ , the button will change from red to blue, and the light is On. Press the button ☀ again, the button will change from blue to red, and the light is Off.

Press the button ☀ for 3 seconds, the light will be adjusted from 100% to 10%. Press the button for another 3 seconds, the light will be adjusted from 10% to 100%.
Brightness | 100% | 50% | 10%

3.Explosion-proof Film

If the mirror is suddenly broken by external force, the explosion-proof film can prevent the fragments of the mirror from falling. There will be only cracks on the mirror with the explosion-proof film.
4. Mirror & Wall Control

Our mirror controller has the memory function which can memorize the final status of:

1. The light on or off.

2. The light brightness.

3. The light temperature.

Turn on the mirror light and keep it on, and then you can control it by the switch on the wall.
5.Adjustable Lights

Adjustable Lights

The light of the mirror could be switched among cold white light(6000K), natural light(4000K) and warm white light(3000K).

6.Bluetooth(Optional)

The two bluetooth speakers will be activated after the electricity is on.
And you could use smartphone or tablet PC to connect with them to play music.

7.Floor Leaning Bracket (Optional)

The mirror could be installed to the floor leaning branket, and the angle of inclination of the mirror is adjustable.

Notice:
